

STATEMENT REGARDING THE COUNTY AND MIND OC ENDING PARTNERSHIP ON BE WELL OC CAMPUSES

Santa Ana, Calif. (October 6, 2026) – Through this agreement, the County of Orange has assumed direct oversight of two mental health services campuses. For our residents, the change means that in addition to the 91 treatment beds currently serving patients in Orange, an additional 96 treatment beds will soon become available at the Irvine facility.

Closing this chapter was necessary to ensure that Orange County's access to vital mental health resources is not further delayed.

With the County already providing critical services at the Orange Campus in our district, the opening of the Irvine campus will add badly needed service capacity, including pediatric treatment beds.

Bringing these resources under the auspices of OC Health Care Agency will assist in ensuring the transition of care is a smooth and rapid one for our residents.

Supervisor Vicente Sarmiento was elected to the Orange County Board of Supervisors in November 2022. He represents the Second District, which includes Santa Ana and portions of Anaheim, Garden Grove, Orange, and Tustin. For additional information, visit <https://d2.ocgov.com/supervisor>.
